Subject: Statement from ODNR

Duane,

In response to your questions, please see the following statement:

ODNR met specifically with ODOT and the Ohio Dept. of Health in July of 2018 to discuss the use of Aqua Salina on Ohio's roads. At that time testing conducted by ODNR and ODH determined that the materials found in the product were within acceptable levels for use de-icing roads. This conclusion can be found at the bottom of page six of ODNR's "2017 Aqua Salina Radiation Assessment Report" which I believe you have received.

ODOT's use of the product complies with the Ohio Revised Code provisions related to the surface application of brine.

In light of these answers, would you like us to simply mail the balance of your public records request?

Thanks,

Steve
